Summary

Based on information provided by the applicant, referral comments as appropriate from DPD, Water (SPU), Fire Departments (SFD), Seattle City Light, and review by the Land Use Planner, the above cited criteria have been met subject to the conditions imposed at the end of this decision. Conditions include the filing of No-protest Agreements for each proposed parcel for future improvements of 33rd Avenue S., as required by SMC 23.53.0154 D2. When these conditions are met, the lots to be created will meet all minimum standards or applicable exceptions as set forth in the Land Use Code and other applicable codes, and are consistent with applicable development standards. As conditioned, this short subdivision can be provided with vehicular access, public and private utilities and access (including emergency vehicles). Adequate provisions for drainage control, water supply and sanitary sewage disposal have been provided for each lot and service is assured, subject to standard conditions governing utility extensions. The proposal site is not located in a mapped environmentally critical area nor were any environmentally critical areas observed on site; therefore SMC 25.09.240 is not applicable. The proposed plat maximizes the retention of existing trees. The public use and interest are served by the proposal since all applicable criteria are met and the proposal creates the potential for additional housing opportunities in the City.
